## *Our Philosophy*

International Marmi is a young company but with 30 years experience. We have received an important knowledge of tradition and culture of marble manufacturing and we are proud to take over from the craftsman of the Italian Renaissance, from the sculptors and from the great architects of our time.

## *Sapiently Worked*

We consider this heritage as a privilege and an opportunity , incentives to face the comparison on the international trade. Moreover, International Marmi produces objects and tables with marble, a precious and rare material which has to be kneaded with expertise and competence, but above all with the passion of our artisans , who treat our product as " unique pieces ".

WE WORK WITH  
EXCELLENT MATERIALS  
FROM THE HEART  
OF TUSCANY,  
CLOSE OUR COMPANY

## *Marble*

The word “marble” comes from the Greek and means “shining stone”, is known, besides for its aesthetic beauty, for its mechanical characteristics since it has a high durability in time, this is why artists, sculptors and architects have used this material both in the artistic and architectural fields. It’s a natural stone, precisely a metamorphic rock made of calcium carbonate.

The Marble still amazes for its unique colors, more or less intense, grains. Nature gives us unique materials, small works of art, which are worked with skill to create unique pieces.

We are accustomed to seeing the Marble thanks to its use in the numerous works of art that surround us in our Bel-Paese, we are fascinated by the great sculptors of the past, the works pervaded by passion, the ability to transform such a durable material in time, in apparently delicate and surprisingly light works.

## *Do we know where the marble came from?*

The Marble is extracted from the Cave, with techniques, which have developed enormously in the last hundred and fifty years. The “bancata” of marble is cut and physically detached from the Mountain, all this happens with great care and preparation, so that there is the least possible waste and the “cultivation” of the quarry can continue in a regular way. There are many uses we can make, Art, Construction, Furnishing, Urban Planning

## *Custom Made*

Our company combines the efficiency of a large production with the specificity of craftsmanship, allowing us to customize our products to meet customer needs.

Our line of products, designed and made in Tuscany, at a step from the Carrara quarries and in the heart of Italian art and design, is at your disposal to furnish space with a timeless style.

## *Our range of products*

Our line of products, designed and made in Tuscany, at a step from the Carrara quarries and in the heart of Italian art and design, is at your disposal to furnish space with a timeless style.
